ENERGY POLICY

Purpose:

This Energy Policy Statement outlines Apollo Tyres Limited commitment to energy use and its management. Its purpose is to manage energy resources responsibly and efficiently to minimise our energy use, reduce our impact on the environment and create awareness among employees.

Commitment:

We are committed to manufacture our products in an energy efficient manner as per our stated value of protecting the environment to create an overall positive impact on the eco-system. We will be proactive in our energy management and will maintain transparency in reporting.

Objectives:

We will demonstrate our commitment through following actions.

- To enrol with SBTi for near term and Net Zero by 2050.
- To Involve employees at all levels to promote energy conservation and resource efficiency.
- To Comply with all applicable legal and other requirements related to energy use and will target beyond the statutory requirements.
- To Reduce dependence on fossil fuel by enhancing use of renewable energy resources.
- To Procure energy efficient products & services and focus during design stage for the energy performance improvement.
- To Improve energy efficiencies in our operations by reducing wastage, use of energy efficient technologies and having an energy efficiency improvement program on regular basis.
- To Ensure the availability of all necessary information and resources for achieving the objectives and targets on energy performance. The energy performance indicators will be used to monitor and review the energy performance for continual improvement.
- To Integrate the energy policy into our business planning, decision making and performance review at appropriate levels in line with our "Net Zero" commitment.

We commit to communicate this policy to all our employees, those working for and on our behalf and to make it available to interested parties on request.
